CONTENTS

Volume 4 — 1960

pages

BERSTEIN, I. and HILTON, P. J., Category and generalized Hopf invariants 437–451

BILLINGSLEY, PATRICK, Hausdorff dimension in probability theory 187–209

BLUMENTHAL, R. M. and GETOOR, R. K., A dimension theorem for sample functions of stable processes 370–375

BREIMAN, LEO, On achieving channel capacity in finite-memory channels 246–252

BROWDER, WILLIAM, Homology operations and loop spaces . . . 347–357

BRUCK, R. H., Normal endomorphisms 38– 87

CHACON, R. V. and ORNSTEIN, D. S., A general ergodic theorem . 153–160

CHUNG, K. L., On last exit times 629–639

FEIT, WALTER, On a class of doubly transitive permutation groups 170–186

FELL, J. M. G., C^*-algebras with smooth dual 221–230

FLEMING, WENDELL H., Functions whose partial derivatives are measures 452–478

FULLERTON, R. E., The structure of contours of a Fréchet surface . 619–628

GETOOR, R. K., with BLUMENTHAL, R. M., A dimension theorem for sample functions of stable processes 370–375

GILLMAN, LEONARD and JERISON, MEYER, Quotient fields of residue class rings of function rings 425–436

GORDON, BASIL and RUBEL, L. A., On the density of sets of integers possessing additive bases 367–369

GUGENHEIM, V. K. A. M., On a theorem of E. H. Brown 292–311

GUNNING, R. C., Homogeneous symplectic multipliers 575–583

HAHN, HWA S., Some remarks on A. C. Schaeffer's paper on Dirichlet series 501–506

HERMANN, ROBERT, Obstruction theory for fibre spaces 9– 27

HEWITT, EDWIN and KAKUTANI, SHIZUO, A class of multiplicative

linear functionals on the measure algebra of a locally compact Abelian group 553–574

HILTON, P. J., with BERSTEIN, I., Category and generalized Hopf invariants 437–451

HOCHSCHILD, G., Algebraic Lie algebras and representative functions. Supplement 609–618

HSIUNG, CHUAN-CHIH, Some uniqueness theorems on Riemannian manifolds with boundary 526–540

HUNT, G. A., Markoff chains and Martin boundaries. 313–340

ISBELL, J. R., Adequate subcategories 541–552

ITÔ, KIYOSI and MCKEAN, H. P., JR., Potentials and the random walk 119–132

JENKINS, JAMES A., On the global structure of the trajectories of a positive quadratic differential 405–412

———, On weighted distortion in conformal mapping 28– 37

JERISON, MEYER, with GILLMAN, LEONARD, Quotient fields of residue class rings of function rings 425–436

KAHANE, J. P. and RUBEL, L. A., On Weierstrass products of zero type on the real axis 584–592

KAKUTANI, SHIZUO, with HEWITT, EDWIN, A class of multiplicative linear functionals on the measure algebra of a locally compact Abelian group 553–574

KAN, DANIEL M., Homotopy groups, commutators, and Γ-groups . 1– 8

KERVAIRE, MICHEL A., Some nonstable homotopy groups of Lie groups 161–169

KOIZUMI, SHOJI, On Albanese varieties 358–366

KREYSZIG, ERWIN and TODD, JOHN, The radius of univalence of Bessel functions I 143–149

LEVINSON, NORMAN, Limiting theorems for age-dependent branching processes 100–118

LÉVY, AZRIEL, On a spectrum of set theories 413–424

MARDEŠIĆ, SIBE, On covering dimension and inverse limits of compact spaces 278–291

MCKEAN, H. P., JR., with ITÔ, KIYOSI, Potentials and the random walk 119–132

MONTGOMERY, D. and YANG, C. T., Groups on S^n with principal orbits of dimension $n-3$ 507–517

ORNSTEIN, D. S., with CHACON, R. V., A general ergodic theorem 153–160

PETERSON, F. P. and STEIN, N., The dual of a secondary cohomology operation 397–404

REINER, IRVING, Behavior of integral group representations under ground ring extension 640–651

RHOADES, B. E., Some properties of totally coregular matrices . . 518–525

RUBEL, L. A., with GORDON, BASIL, On the density of sets of integers possessing additive bases 367–369

RUBEL, L. A., with KAHANE, J. P., On Weierstrass products of zero type on the real axis 584–592

SCHAEFFER, A. C.†, Dirichlet series. 479–500

SCHENKMAN, EUGENE, On the norm of a group 150–152

SCOTT, W. R., Solvable factorizable groups II 652–655

ŠPAČEK, ANTONÍN, Probability measures in infinite Cartesian products 210–220

SPITZER, F. L. and STONE, C. J., A class of Toeplitz forms and their application to probability theory 253–277

STEIN, N., with PETERSON, F. P., The dual of a secondary cohomology operation 397–404

STONE, C. J., with SPITZER, F. L., A class of Toeplitz forms and their application to probability theory 253–277

SWAN, RICHARD G., The p-period of a finite group 341–346

TODD, JOHN, with KREYSZIG, ERWIN, The radius of univalence of Bessel functions I 143–149

WALL, DRURY W., Cartan invariants of algebras with unique minimal faithful representations 133–142

WALTER, JOHN H., Structure of cleft rings II 376–396

WARNER, SETH, Bornological structures 231–245

WIDOM, HAROLD, Inversion of Toeplitz matrices II 88– 99

YANG, C. T., with MONTGOMERY, D., Groups on S^n with principal orbits of dimension $n-3$ 507–517

ZIMMERBERG, HYMAN J., Two-point boundary problems involving a parameter linearly 593–608
